thanks for keeping me abreast of thing!

Table 2X has RETO spelled as PETO.

Subject: Cabo Rojo Vapor results

Buenos dias Denise,

I will attach the results for all the vapor samples in a summary table. I will also attach the figures with results for PRICO West buildings (because of the size, I will email the second figure in a separate email!). I have previously emailed you the vapor results on a figure for each of the other PSAs.

Frances is currently preparing figures for PRIDCO East and PRIDCO West locations for the soil and groundwater screening phase of work. We currently anticipate starting that sampling around May 3 (next Friday) and we would appreciate you input on the locations ASAP after I email you the figures.

Muchas gracias!  
Susan
